

Plasma treatment on Wires & Cables for Ink Adhesion

In Wire & Cable industry with increase in technology, Wire & Cable industries runs machines at High Speed, So that they can increase the Production and achieve economic of scale. At such a high speed there is always a problem of wettability and adhesion, ink gets peel off, with Plasma Treater we ensure there is wettability and proper adhesion, so that ink doesnot get peel off at High Speed. Also material such as HDPE & LDPE, even at Low speed there is Problem of wettability and Adhesion, we had designed Atmospheric Plasma Treater to solve the long run problem of wire & cable industries to ensure there is wettability and adhesion, so that there is proper bonding between inks & polymer.

WHY US?

We are a customer-focussed company, which works with customer perspectives in mind. Some of our specialities, which make us a preferred business partner for our clients are:

- Highest standards of quality.
- Innovative Approach
- Timely Deliveries
- Competitive Pricing
- Unending pursuit of product, process & performance optimization

“

Eltech is an innovative organization with a high level of know-how, continuously developing new Plasma and Corona equipment to help solving adhesion problems, and to meet high customer demands.
